Spark Liaison: Greta Bruce gretab@bu.edu,

PM: Lingyang Jiang lingyanj@bu.edu,

Yuanming (John) Chai jchai23@bu.edu, **ychai23**,

Mackenzie Knox mfknox@bu.edu **kenzieknox**,

Quinn Relyea qrelyea@bu.edu **Relishyeah**,

Giancarlo Sirio gsirio@bu.edu **gian-s**,

Xavier Ruiz xruiz@bu.edu **xav-ie**

Scrum 3/3

- What we worked on:
 - Imported, and cleaned data that was given to us
 - Merged important features together in 311 and Census data
 - Created visualizations of various features in 311 data and mapped them
 - Housing Violation and Parking Violation data was pulled and received by team
- Blockers
 - Getting a list of existing social services in the city of revere that includes the addresses, name/type of the social services and maybe the district as well
- Upcoming Work
 - Cross referencing addresses in order to get 311 request's addresses into Census tracts and create visualizations
 - Potentially map different buildings and places for social services
 - Import, clean, and create visualizations for ticketing data. Potential correlations with Census and 311 data.
 - Creating separate analyses of covid data once we get more understanding of demographics
 - Talk to MAPC
