

Weekly SCRUM

What has the team done towards the project this week?

- Merged the quincy datasets properly using sjoin
- Calculated population density by grouping number of units

What work does the team plan to do this week?

- When we merged the datasets, we found that some addresses do not belong to a parcel
 - We need to delete this data moving forward - they don't exist
- Implement workflow for entire state data:
 - Merge datasets
 - Apply our Quincy process to the entire state
 - Calculate population density per parcel
 - Generate the map that Alex did for units

Is the team having any issues?

- We were all stressed about the midterm and assignments we had for this class, so we were unable to accomplish a lot this week; however, with the new extensions we should be able to complete deliverable 2 on time :)
