Weekly SCRUM

What has the team done towards the project this week?
- Converted files to feather files, so we could open them on our computers
- Successfully downloaded and opened files with geofeather and geopandas
- Started a google COLAB to share all the opened documents

What work does the team plan to do this week?
- Finish deliverable 1 - we were unable to submit on time due to files being hard to open on our computers
- Develop a process to combine the necessary information from both datasets into an updated housing dataset with updated number of units, number of available units, addresses, and residential density

Is the team having any issues?
- We are behind in developing a process to combine and clean datasets due to the files being hard to open and manage
- Knowing what columns we need to grab from each dataset to use for our final database
