Weekly Project SCRUM Report
Date: 02/24/21
Project Name: Baystate Banner: LatinX Republican Support
Team Members: Ngozi Omatu Song Xie Matan Ziegel Gil Lotzky Annie Xie
Tasks Completed this Week: - Use census.org to find information about our six target cities (Lawerance, Springfield, Lynn, Acushnet, Southwick, and Douglas) - Explore other sources to see if there is data on demographic data pertaining to the LatinX community for each town - Finished deliverable 0 and updated it once again after client review
Plans for Next Week: - Go to census and put in counties for each city to find more specific breakdown for races for the LatinX community in each town - Submit weekly reports at github - Submit PDF of Deliverable 1 in github
Obstacles and Questions: - We need to be aware of potential distortions to the population numbers such that preference for a certain candidate is due to a change in preference rather than simply an increase in population - There is no connection between demographic data and election data as the breakdown for election results in each town and its demographic data do not match up - Think about how we might be able to produce a heat map for each town based on demographic and voter choice
When is the next meeting with the client? Next client meeting on 03/03
