Weekly Project SCRUM Report
Date: 03/10/21
Project Name: Baystate Banner: LatinX Republican Support
Team Members: Ngozi Omatu Song Xie Matan Ziegel Gil Lotzky Anna Xie
Tasks Completed this Week: -   Currently, we are still working on the tasks that we plan to complete from last week (Connecting the tract and precincts visually as demographic tract data so not match up with election precinct data)

Plans for Next Week:
  -   Produce visualization of the results for connecting the tracts of all the six cities with their respected precincts
  -   Try to produce some initial results for the data by answering the key questions mentioned in the project proposal
  -   Continue practicing Geopanda and being familiar with the library
  -   After this, we are planning to include more cities in the dataset
  -   Be more consistent in updating PM with our work (sending weekly reports with screenshots of code)
  -   Reformat our repo and upload missing scrum notes for previous weeks
  -   Ensure our pull requests and deliverables are correctly categorized

Obstacles and Questions:
  -   Currently, we are waiting for a specialist to teach us how to use Geopanda
  -   How can we match up election data and demographic data more efficiently without having to manually check whether each town's precinct is the same area as the tracts from the demographic data?

When is the next meeting with the client? Next client meeting on 03/17
